

Smart Meter System

- Advanced or Smart Meter System are next-generation digital, electric meters that wirelessly send regular meter readings to your energy provider in a safe, secure, and automatic way.
- This provides more accurate billing, better power quality and reliability, and a better understanding of your energy usage and control of your bill
- The smart meter system is the first step in developing Smart Communities, with things such as smart street lighting and traffic management controls

Benefits:

- **Enhanced customer service** – The advanced data gathered assists our Customer Care representatives in expediting and more effectively addressing customer billing questions and concerns
- **Faster restoration** – Outage locations and problems can be pinpointed, allowing for a quicker power restoration and more prevention of outages
- **Cost controls** – Manage costs with online access to customized usage analytics; set up high-bill alerts and get personalized tips to help to avoid them
- **Remote meter reading and activation** – Advanced meters can be read and controlled remotely, meaning no more waiting for estimated bills or meter readers and easier service activation or transfer
- **Improved access to your energy** – Detailed, near-real-time usage information gives you more control over your energy use, down to 15-minute increments that show you what times of day you use the most energy
